

IReC-1

Internet Remote Control...installed in your transmitter

- Internal mounting on Crown classic transmitters – new and old
- Remote Metering/Control/Status function – 20+ can be programmed at once
- Silence monitoring and programmable alarms with e-mail alerts
- Three levels of Password Control
- Low power consumption for ultimate reliability
- Long-term logging of transmitter parameters
- Utilizes Opto-coupled control — no mechanical relays
- Field installation kits available with instructions for all units
- Easy path for future upgrades
- Use with your computer, tablet, cell phone, or all three

Users.....	Unlimited
Password Control Levels.....	3
“Virtual” Metering Channels (All can be renamed).....	20
Relays (Each can be defined as either Pulse or Toggle).....	9
Opto-Coupled Control.....	12 volt maximum
Logging of input status	1/hour to 1/day

This Module is available for only \$850. If ordered with a new transmitter only \$750 and it will be preinstalled. The IReC-1 Module may be added to existing Crown Classic transmitters as a Crown Broadcast factory upgrade, or as an upgrade kit for installation by a station engineer.

Once this module is installed, there are no ongoing charges or fees to be paid for this service. Your standard Internet fees may apply.
